- ✓ Performance: 1st in weaning, yearling and ADG
- ✓ Disposition: Calm and Quiet
- ✓ Pedigree: 4 generations of great AI Sires
- ✓ Fertility: 42cm scrotal at 15 months
- ✓ EPDs: One of a Kind

R/H MYFOCUS 150X may be the greatest SimAngus bull we have ever raised. In addition to having an actual 69 pound birth weight, born unassisted out of a first calf heifer, he ranked first in his contemporary group at weaning (38 head), first in his contemporary group at yearling (25 head), and first in his contemporary group for ADG on PBG Forage Test (44 head). His API index is off the chart by \$6 and TI off the chart by \$3. He combines 4 outstanding sires from two great breeds, (Mytty In Focus X Hooks Shear Force 38K X Lchman Lucky Buck 7049C X Circle S Leachman 600U. His maternal grandam has 7 calves with light bwt ratio @ 111, 7 weaning ratios @ 112 and 3 yearling ratios @ 109. Easy moving and structurally sound are two of his strong traits. He has been DNA tested homozygous polled and homozygous black. This young sire does everything we are looking for in our program. Don't miss this opportunity to put these one of a kind EPD's, high performance, eye appeal and total package herd
